

DIRECWAY Two-Way Satellite Dishes Used on Ground Zero

New York City, September 2001

Robert Zohn & Al Maldonado, DIRECWAY 2-Way Certified Installers, have set up satellite Internet systems at several New York City buildings near Ground Zero that lost Internet and phone service due to the terrorist attack.

DIRECWAY service offers high-speed Internet access that is “always on” and requires no phone line or ISP.

Photos taken on the 35th floor roof of building next to the World Trade Center - Ground Zero
