

Can You Connect Your Branches Without a Telco?

THE REAL QUESTION

The connectivity quiz question: "Are you satisfied with the lease on communication lines that are being used to connect your corporate branches to the Head Office?"

Your answer:

- a) I don't know.
- b) Yes, they are affordable, reliable and easy to set up.
- c) Considering that there are no alternatives, yes!

IF YOU HAVE ANSWERED:

- a) Maybe it's time for you to discover what true communication service is. Call us. We can help.
- b) Please, try again. This time, take reality into account.
- c) Common answer.

If you have answered c), then you are among the majority of the corporations that are connecting their branches in a world without options.

It is either a local telco or nothing. It is either a leased line or no connection at all.

Now, you have the alternative. Now, you can have a flexible connection that enables branch access to the Head Office regardless of the location, phone line, cable or fiber availability. Yes, you eliminate any geographical restriction your current arrangement may impose. You have nothing to lose. You can just gain a freedom to communicate. Anywhere. Anytime.

THE REAL ANSWER

Two-way satellite connection.

So simple, yet so efficient. After years of perfecting the technology, finally the production grade solution is available for satellite-based network connectivity.

In partnership with C-COM Satellite Systems and Hughes Networks, we offer you a peace of mind. For flexibility, availability and convenience we offer you a consistent connectivity solution that does not depend on a location.

Two-way communication satellite based network
