

# Can you spell In(Tee)rnet Time?

## THE REAL QUESTION

What you really want to know is: "How can I have high-speed internet access for my clients even on a golf course or during a golf tournament?"

Your answer:

- a) We've got high-speed golf balls...
- b) No, our golfers do not use internet.
- c) That would be nice, but is it possible?

## IF YOU HAVE ANSWERED:

- a) Exactly. But business does not stop when golf round starts. That's where we can help.
- b) Please, try again. This time, take reality into account.
- c) Yes, it is both possible and easy.

If you have answered "c", then you are among the business oriented golf course operators that anticipate their clients needs in advance.

You know that having timely access to information is important to your golfers. You know that real-time coverage of your golf tournaments is important. You know that your ability to effectively communicate with your patrons is key to business development and growth.

That's where we can help you. We will put everything together for you. We will bring the high speed internet connection right to your golf club. We will extend your high speed internet to your golf course. We will enable you to have more satisfied golfers. How can we do all this?

The answer is simple. Satellite.

## THE REAL ANSWER

Two-way satellite connection.

So simple, yet so efficient. After years of perfecting the technology, finally the consumer grade solution is available for satellite-based internet connectivity. In partnership with C-COM Satellite Systems and Hughes Networks, we offer you a peace of mind. For flexibility, availability and convenience we offer you a consistent internet connectivity solution that does not depend on a location.

Two-way satellite based internet connection
