

Is Your Hotel Internet Ready?

THE REAL QUESTION

If you are in the hospitality industry, you should be able to answer the following: "Can our hotel managers offer high speed internet to all our guests today?"

Your answer:

- a) What?
- b) No, our guests do not need internet connection.
- c) That is a good idea, but how can we achieve that?

IF YOU HAVE ANSWERED:

- a) It is definitely time for you to sharpen that competitive edge in hospitality industry. Call us. We can help.
- b) Please, try again. This time, take reality into account.
- c) Much easier that you would ever have guessed.

If you have answered c), then you are among the majority of the hoteliers across the world that are thinking about it, but find it too complex to implement.

Numerous factors, like cost, time to implement, flexibility of service, network configuration and performance of the solution cross your mind. Who is going to take care of all that? How is it going to work? How can we put it all together? Too many questions, too few clear answers.

That's where we can help you. We will put everything together for you. We will enable your guests to have high speed internet connection right in their room. We will enable you to have more satisfied customers like that. How can we do all this?

The answer is simple. Satellite.

THE REAL ANSWER

Two-way satellite connection.

So simple, yet so efficient. After years of perfecting the technology, finally the consumer grade solution is available for satellite-based internet connectivity. In partnership with C-COM Satellite Systems and Hughes Networks, we offer you a peace of mind. For flexibility, availability and convenience we offer you a consistent internet connectivity solution that does not depend on a location.

Two-way satellite based internet connection
